CLASS 1: INLINE VS BLOCK LINE

APNA COLLEGE

Inline v/s Block

Block Elements

Takes up the full-width available (whole block)

Start from new line

Inline Elements

Takes up only necessary width

Don't start from new line

Block element: take 1 line completely.

Inline element: not take 1 line completely, just take necessary width.

=====

Am I Inline or Block?

- Heading Element *block*
- Paragraph Element
- Anchor Tag
- Image Element

Heading element: it take 1 line completely. So it is block element.

Hello World

Apna College

h1 1110x37
Color #000000
Font 32px Times
Margin 21.44px 0px

ACCESSIBILITY

Elements

```

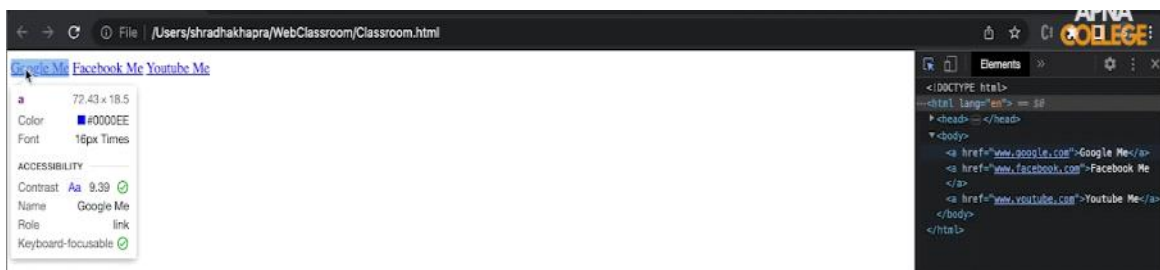

<!DOCTYPE html>
<html lang="en">
  <head>
  </head>
  <body>
    <h1>Hello World</h1>
    <h2>Apna College</h2>
  </body>
</html>

```

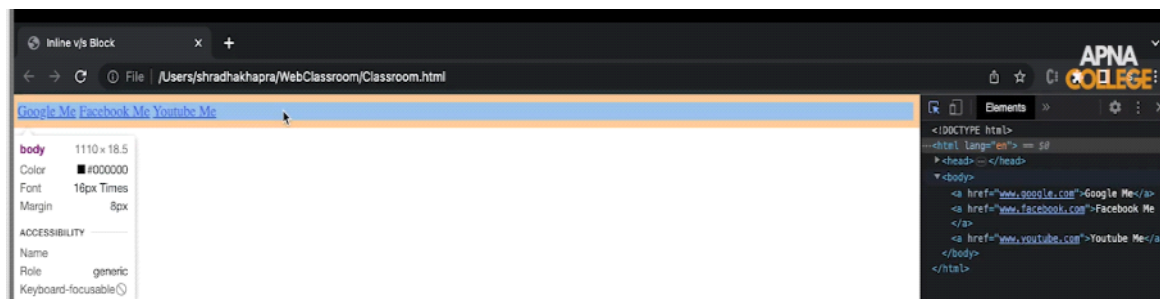

Paragraph element: it also take 1 line completely. So Block element.

Anchore tag: it is inline element. Because they are same line

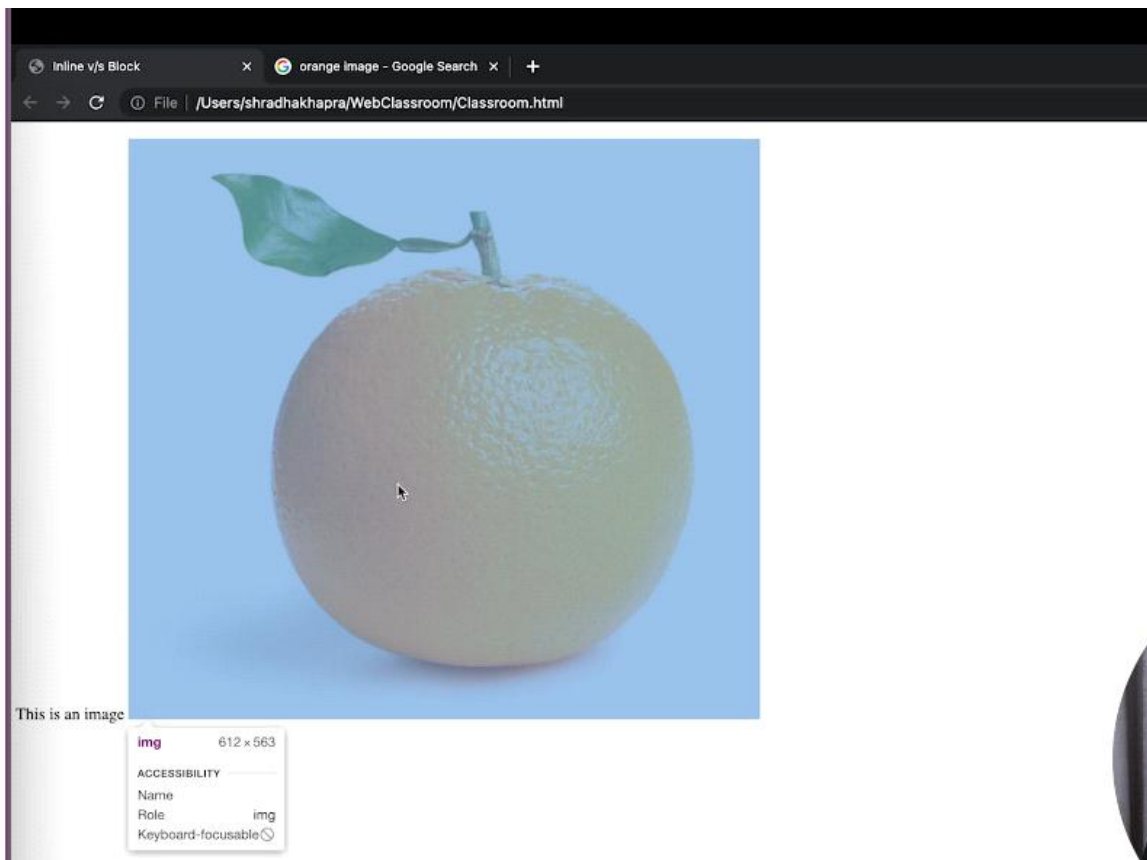

Here , Google me take just necessary part which it's needed.

Here, this is come because body tag: ::note body tag is : block element.

Image tag: inline element.

Take just necessary space, don't take all width.

Two image display in the same line. So, it is inline element.

====

Class 2: Div element (content division element)

It is used for separate necessary part.

Div Element

content
division
element

Div is a **container** used to hold other HTML elements or group elements together

It is a **block** Element

```
<meta charset="UTF-8" />
<meta http-equiv="X-UA-Compatible" content="IE=edge" />
<meta name="viewport" content="width=device-width, initial-scale=1.0" />
<title>Inline v/s Block</title>
</head>
<body>
  <div>
    <a href="http://www.google.com">Google</a>
    <a href="http://www.youtube.com">Youtube</a>
  </div>

  <a href="http://www.facebook.com">Facebook</a>
</body>
```

Div: it used for create group . Here, google.com , youtube.com are in same group , it create 1 div.

==

Website: is collection of div.

===

Class 3: Span element

Span Element

Span is also a generic **container** used to hold other HTML elements or group elements together

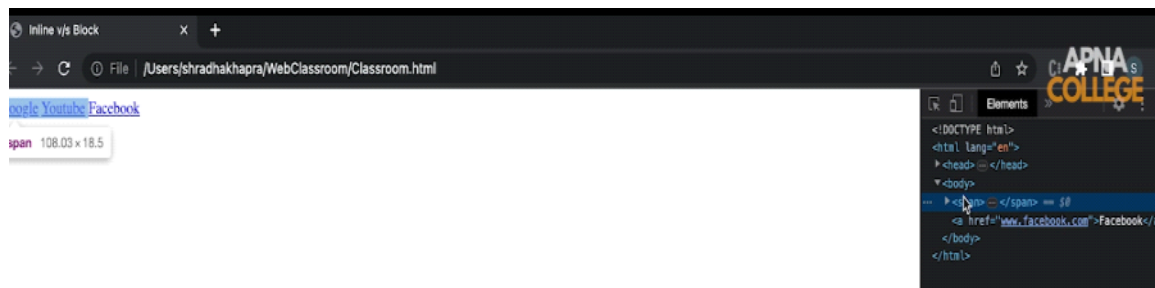

It is an **inline** Element

Span element: it also used for creating group , same as block element. But SPAN IS inline element.

NOTE: span is inline element but div is block element.

```
<title>Inline v/s Block</title>
</head>
<body>
  <span>
    <a href="www.google.com">Google</a>
    <a href="www.youtube.com">Youtube</a>
  </span>

  <a href="www.facebook.com">Facebook</a>
</body>
```

Google, youtube are in group here. Facebook are same line.

=====

Class 4: Hr tag : take a break in the page.

Hr Tag

Horizontal Rule Element

```
<hr>
```

*
 line break*

*This is my name
which is
Shradha
Khapra*

```
<title>Inline v/s Block</title>
</head>
<body>
  <p>This is my name which is Shradha Khapra.</p>
  <p>I am your web development teacher.</p>
  <hr>
  <p>I teach you on Apna College.</p>
  <p>I love coding.</p>
</body>
```

This is my name which is Shradha Khapra.

I am your web development teacher.

I teach you on Apna College.

I love coding.

Using <hr> tag :

Shradha Khapra

I love to teach:-)

Education

- Class X (CBSE) : 10 CGPA
- Class XII (CBSE) : 94.4%
- B.Tech (NSIT, Delhi): 8.9 CGPA

Skills

- HTML, CSS, JavaScript, Bootstrap
- ReactJS
- NodeJS, MySQL, MongoDB

Hobbies

- Reading Books
- Debating

Contact

- Email - hello@apnacollege.in
- [LinkedIn](#)

Class 5: sub and sup

Sub & Sup Tag

$a^2 = b^2 + c^2$ ← Superscript `a ²`

H₂O

H `₂ 0`

Subscript

05. Sup & Sub Tags.mp4

```
</head>
<body>
  <h1>a<sup>2</sup></h1>
  <h1>H<sub>2</sub>O</h1>
</body>
</html>
```

H1 tag is: parent tag, and h1's child is : sub.

$$a^2$$

$$H_2O$$

=====

Class 6: Practice question

Practice Qs 4

Print the following on the screen using `<h1>` heading elements

Pythagoras theorem says $a^2 + b^2 = c^2$

Formula for glucose is $C_6H_{12}O_6$

```
<body>
  <h1>
    Pythagoras theorem says a<sup>2</sup> + b<sup>2</sup> = c<sup>2</sup>
  </h1>
  <h1> Formula for glucose is C<sub>6</sub>H<sub>12</sub>O<sub>6</sub></h1>
</body>
```

===

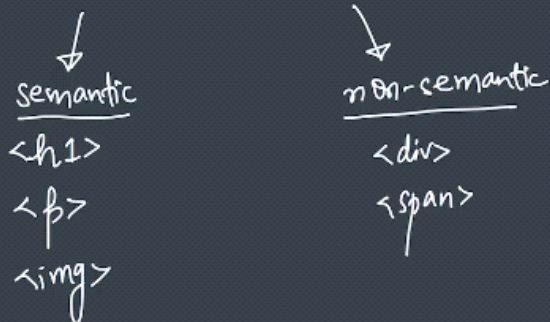

Class 7 : semantic Markup

Sementic tag: we can easily understand by see this tag.

Non-semantic tag: we can't understand by see this tag.

Semantic Markup

it is the markup that relates to the **meaning of content**

Note: : header and footer are symentic tag.

A good website always uses header and footer tag

SEO: symentic tag make website:: SEO friendly.

Because SEO search symentic tag.

Symantic tag: -make meaning full

- more readable

- screen reader user's feel good.

=====

Class : 8 Symantic tag introduction

Semantic Markup

<header> </header>

<main> </main>

<footer> </footer>

<nav> </nav>

Header tag:

```
</head>
<body>
  <header>
    Apna College <a href="www.apnacollege.in">go to main page</a>
  </header>
</body>
```

=====

Main tag:

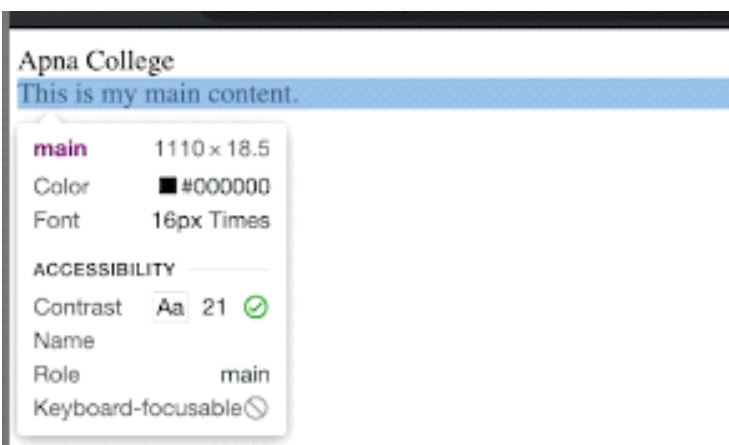

It used for display major part.

Header , navigation part are separate, not main part.

Main tag: used for display main content. Main explanation which is used

to describe about the movie or main part which is used to display description.

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta http-equiv="X-UA-Compatible" content="IE=edge" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>HTML - Level 2</title>
  </head>
  <body>
    <header>Apna College</header>
    <main>This is my main content.</main>
  </body>
</html>
```

=====

Footer tag: it comes bottom on the website.

It gives contact information like facebook link , instagram link,

```
</head>
<body>
  <header>Apna College</header>
  <main>This is my main content.</main>
  <footer>Made with &hearts;</footer>
</body>
</html>
```

=====

We can create nav tag : inside the header tag.

```

<title>HTML - Level 2</title>
</head>
<body>
  <header>
    Apna College
    <nav>
      <ul>
        <li><a href="/about.html">About Us</a></li>
        <li><a href="/contact.html">Contact Us</a></li>
      </ul>
    </nav>
  </header>
  <main>This is my main content.</main>
  <footer>Made with &hearts;</footer>
</body>

```

Apna College

- [About Us](#)
- [Contact Us](#)

This is my main content.
Made with ♥

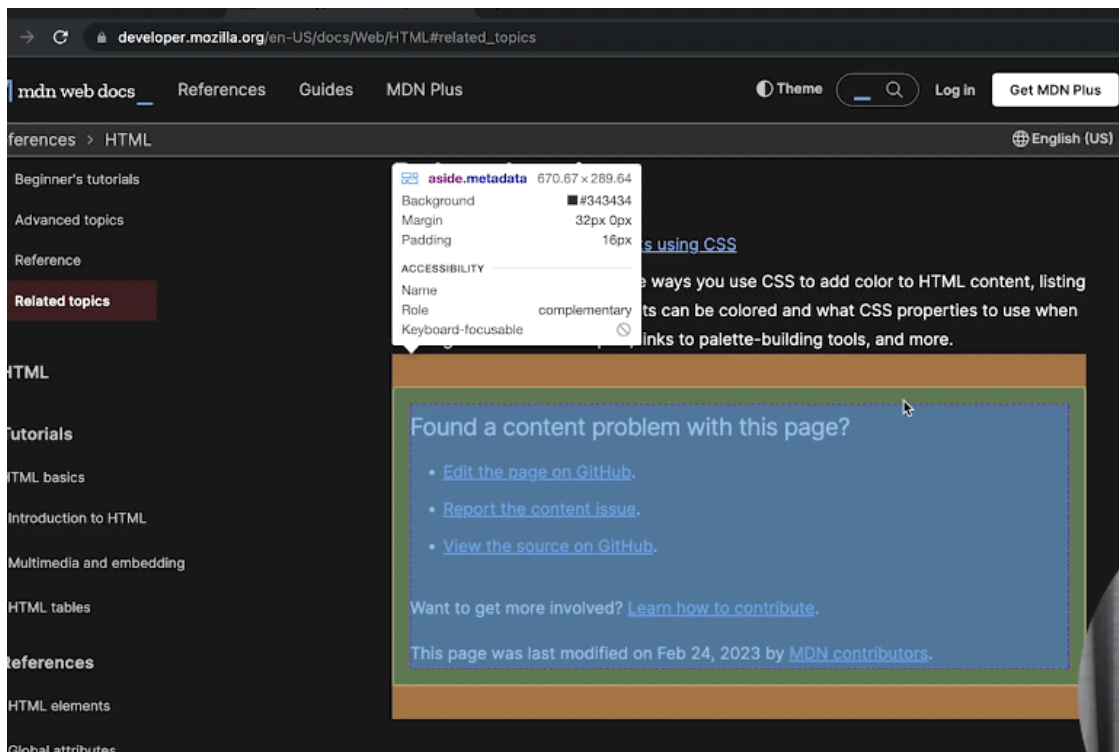

Semantic Markup

<article> </article>

<section> </section>

<aside> </aside>

Aside tag: create link which content is indirectly related with the Website.

Class 9:

Practice Qs 6

- Add semantic markup to your Portfolio page.

We use: footer, header, section tag for skills, education.

```

9      <body>
10     <header>
11       <h1>Shradha Khapra</h1>
12       <p>I love to teach:-</p>
13       
14       <hr />
15     </header>
16     <!-- Portfolio Sections -->
17     <section>
18       <h2>Education</h2>
19       <ul>
20         <li><b>Class X</b> (CBSE) : 10 CGPA</li>
21         <li><b>Class XII</b> (CBSE) : 94.4%</li>
22         <li><b>B.Tech</b> (NSIT, Delhi): 8.9 CGPA</li>
23       </ul>
24       <hr />
25     </section>
26     <h2>Skills</h2>
27     <ul>
28       <li>HTML, CSS, JavaScript, Bootstrap</li>
29       <li>ReactJS</li>
30       <li>NodeJS, MySQL, MongoDB</li>
31     </ul>
32     <hr />
33   
```

```

26
27     <section>
28         <h2>Skills</h2>
29         <ul>
30             <li>HTML, CSS, JavaScript, Bootstrap</li>
31             <li>ReactJS</li>
32             <li>NodeJS, MySQL, MongoDB</li>
33         </ul>
34         <hr />
35     </section>
36
37     <section>
38         <h2>Hobbies</h2>
39         <ul>
40             <li>Reading Books</li>
41             <li>Debating</li>
42         </ul>
43         <hr />
44     </section>

```

```

45
46     <footer>
47         <h2>Contact</h2>
48         <ul>
49             <li><b>Email</b> - hello@apnacollege.in</li>
50             <li>
51                 <a href="https://www.linkedin.com/in/shradha-khapra/">LinkedIn </a>
52             </li>
53         </ul>
54     </footer>
55 </body>
56 </html>

```

In 10,15 line : header

In 17,25,27,35,37,44, line are section create

In 46, 54 line are create footer.

Note: see same as previous. But internally change(CREATE 3 SECTION PART, 1 HEADER PART, 1 FOOTER PART)..

Shradha Khapra

Emmet — the essential toolkit for web-developers

Emmet is a plugin for many popular text editors which greatly improves HTML & CSS workflow:

Watch demo

HTML from CSS
You've already known how to use Emmet abbreviations: its **syntax** is inspired by CSS selectors.

Dynamic snippets
Each abbreviation is transformed in runtime: just slightly change its name to **get a different result**.

Ultra-fast coding
With Emmet you can **write a bunch of code with new tags**, **traverse** and **select** code parts **and more**.

In vs code emmet install already.

In vs code:

! = the boilerplate of html. (! is emmet Abbreviation).

====

Syntax

Child: >

```
nav>ul>li
<nav>
  <ul>
    <li></li>
  </ul>
</nav>
```

Sibling: +

```
div+p+bq
<div></div>
<p></p>
<blockquote></blockquote>
```

Multiplication: *

```
ul>li*5
<ul>
  <li></li>
  <li></li>
  <li></li>
  <li></li>
  <li></li>
</ul>
```

Note: java, c++,emmet has.

```
9  <body>
10  p>div+img|
11  </body>
12  </html>
13  
```

Autocomplete suggestions:

- p>div+img
- img:s
- img:sizes

```
</head>
<body>
  <p>
    <div></div>
    <img src="" alt="">
  </p>
</body>
```

For search in emmet website , how to find emmet list:

Step 1:search emmet and go to emmet website.

Emmet

<https://emmet.io>

Emmet — the essential toolkit for web-developers

The image shows the homepage of the Emmet website. On the left is a dark sidebar with the Emmet logo and navigation links: DOCUMENTATION, DOWNLOAD, and CREDITS. Below these is a 'Become a backer' button and a list of logos for various companies and organizations. The main content area has a dark background. At the top, it says 'Emmet — the essential toolkit for web-developers' in green. Below this, it states 'Emmet is a plugin for many popular text editors which greatly improves HTML & CSS workflow:'. There is a code snippet showing HTML generated from CSS. A large green play button icon is next to the text 'Watch demo'. Below this are six white boxes with text describing features: HTML from CSS, Dynamic snippets, Ultra-fast coding, Customizable, Platform for new tools, and Highly portable. At the bottom right is a large green 'Download' button with the text 'plugin for your favourite editor'.

Step 2: go to document tation

The image shows a close-up of the left sidebar of the Emmet website. It features the Emmet logo at the top, followed by three navigation links: 'DOCUMENTATION' with an external link icon, 'DOWNLOAD', and 'CREDITS'. Below these links is a green button.

Step 3: go to cheat sheet

Merge Lines
Update Image Size
Evaluate Math Expression
Increment/Decrement Number
Reflect CSS Value
Encode/Decode Image to data:URL

Filters

Go to emmet website for better knowledge.

In HTML5 HAS new features that are some html related and some are not Part of html 5

New feature: 1.html living standard.

2 . Javascript API which not related. It i=enhance storage,

multimedia,Hardware access.

=====

How HTML works?

HTML Standard

HTML Standard is a document that tells to the browser how HTML should work.

good read for more details

A Beginner's Guide to HTML5
Learn what HTML5 is, how it differs from previous versions of HTML, and why you should use it on your site.

HTML (Level 2)

Practice Questions

Qs1. Self-learning

Search on the internet & learn to use the video tag in HTML. (Similar to the img tag)

Qs2. Is video tag a semantic tag?

Qs3. Print the following using HTML tags :

Today is the 9th of October and $2^4 = 16$ always

Qs4. Add a new section to your portfolio page for your achievements. Mention anything you have achieved, competitions won, participations etc. in this section. It could be related to coding, tech, art, music, sports, debating etc.

Use the following tags in some manner to achieve this : `<section>`, ``, ``, `<hr>` etc.

Qs5. Print the symbols for copyright & trademark on your webpage.

HTML (Level 2)

Practice Solutions

Ans 1

Use this link for help :

<https://developer.mozilla.org/en-US/docs/Web/HTML/Element/video>

Ans 2

Yes, the HTML video tag is a semantic tag.

Ans 3

```
<p>Today is the 9<sup>th</sup> of October and 2<sup>4</sup> =  
16 always</p>
```

Ans 4

You have to complete this exercise on your own as the portfolio section will be different for each student.

Ans 5

We can do this using HTML entities.

Copyright entity name : **©**

Trademark entity name : **®**

Html code -> browser ->html standard -> generate web page.
